**Section II**  
**SYSTEM OR EQUIPMENT CODES**  
**(Item B12C)**

## SECTION II

### SYSTEM OR EQUIPMENT CODES

(Item B12C)

#### Purpose

The DD Form 350 codes in this section have been developed to facilitate an analysis of DoD procurement by Major Defense Acquisition Program,\* system, or equipment item. However, if an end item or a component identifiable to an end item cannot be identified by a specific code, a request for a code, attached with the applicable DD Form 350, should be addressed to the appropriate organization specified in DoD FAR Supplement 253.204-70. Submission of the DD Form 350 will not be delayed pending resolution of the inquiry.

If a system or equipment code is not applicable to a DD Form 350 transaction or bears a security classification prohibiting unclassified disclosure of the code title in combination with other DD Form 350 items, the code "000" (three zeros) shall be assigned.

#### Description and Use of Code

The code for Item B12C consists of three alphabetical positions. The first position identifies one of the following major categories of equipment:

A	Aircraft	F	Ammunition
B	Aircraft Engines	G	Electronics
C	Missiles & Rockets	H	Other Equipment
D	Vehicles	S	Ships
E	Weapons		

The second position identifies a subdivision of the major category, e.g., trainer aircraft, while the third position identifies the specific item, e.g., an F-111.

Normally, each system or equipment code includes all subsystems, components, repairs and repair parts, modifications, and related supplies and services (other than RDT&E and construction) which are procured specifically for the system or equipment. Exceptions to this rule are those instances where a specific equipment item or a major component has been assigned a separate code, e.g., J-52 Turbojet Aircraft Engines.

When a procurement is for components, parts, or services covering more than one system or equipment and 75 percent or more of the dollar amount is allocable to a single system or equipment, the code for that system or equipment shall be assigned. Otherwise, multi-system procurement shall not be assigned a specific code.

---

\*The Major Defense Acquisition Programs are defined by the criteria in Section 2430, Title 10 of the U.S. Code.

Each department should use only that part of Section II designated for its use, e.g., Part A for Army, Part B for Navy and Part C for Air Force. The arrangement of systems or equipment by major category is as follows:

1. Aircraft are arranged by design number within each basic mission symbol, e.g., A-4, A-5, A-6, and F-4.
2. Aircraft engines are arranged by design number within type of engine.
3. Missiles and rockets are arranged by design number.
4. Air Force electronics and communications items are arranged numerically by system number.
5. All other categories are arranged alphabetically by key word or words and by caliber size.

If an aircraft, missile, or rocket reported on DD Form 350 does not have a mission symbol or letter prefix listed in this manual but does have a design number that is listed, the code applicable to that design number should be assigned. For example, an RB-52 aircraft would be assigned the code for a B-52. In addition, the series symbol for an item is not used, e.g., F-111 is used, rather than F-111A or F-111B.
